

Siva Teja

Software Engineer

Passionate front-end developer with 2.5+ years of professional experience in building and maintaining scalable and user-friendly web applications. Strong Understanding of React Js, Html, Css and JavaScript as well as experience with other front-end technologies such as Redux Tool Kit. Seeking a position where I can use my skills to create visually appealing and user-friendly web applications to make a positive impact on the world.

WORK EXPERIENCE

Xoriant Solutions Pvt. Ltd., Pune, MH.

Sep 2021 – Present

- Currently working as a Software Engineer (Grade G2) and assigned to Daikin City Project.
- Developed robust and scalable web applications using React Js ensuring high performance and optimal user experience.
- Collaborated with design and product team members to implement new feature developments.
- Developed and maintained reusable UI components and libraries, contributing to a more efficient development process and cohesive design language.
- Collaborated with designers and backend developers, translating design specifications into functional frontend components and ensuring smooth data integration.
- Conducted thorough testing and debugging to identify and resolve any front-end issues, optimizing performance and usability.
- Worked independently and as part of a team to meet deadlines and achieve goals.

PROJECTS

Project Title : Daikin City

Sep 2023 - Present

- Developing the ongoing migration of a legacy project to a modern tech stack, demonstrating strategic vision and proactive problem-solving skills.
- Demonstrated proficiency as both developer and tester, ensuring seamless integration of new technologies while maintaining the integrity of existing functionalities.
- Upheld stringent coding standards and testing protocols, ensuring the delivery of high-quality, scalable software solutions that exceed industry standards.
- Facilitated seamless coordination among diverse teams, promoting synergy and information exchange essential for meeting project milestones within allocated resources.

Project Title : HVAC & Daikin LMS Calendar

Mar 2023 – Aug 2023

- Implemented a dynamic LMS calendar that enables users to seamlessly browse and register for training events within the organization.
- Successfully fulfilled the responsibilities of both Frontend Developer and Manual Tester, demonstrating adaptability and versatility within the project team.
- Developed comprehensive manual test cases, encompassing functional, usability, and edge cases, ensuring thorough test coverage and alignment with project requirements.
- Leveraged manual testing scenarios to evaluate user experience, providing valuable insights for UI/UX enhancements and contributing to overall product improvement.

Project Title : Xorpay Lite

Apr 2022 – Dec 2023

- Designed and developed a web portal for displaying payment and invoice details on a dashboard made by customer.
- Assisted in creating responsive layouts, contributing to user-friendly interfaces that adapt smoothly across devices.
- Supported senior developers by building and maintaining UI components, learning the ropes of efficient code structuring.
- Collaborated with the team to identify and troubleshoot issues, gaining hands-on experience in debugging techniques.
