Siva Teja
Sr. Associate Consultant

Passionate front-end developer with 3.6+ years of professional experience in building and optimizing scalable and user-friendly web applications. Proficient in ReactJs, NextJS, HTML5, CSS3 and JavaScript with a strong understanding of Redux Tool Kit. Dedicated to creating visually appealing and user-friendly interfaces that drive positive user experiences.

WORK EXPERIENCE

Infosys Limited, Hyderabad , TG.   **Oct 2024 - Present**

Clients: KSA

- Developed scalable and reusable UI components using NextJs and TailwindCSS, improving maintainability and performance.
- Implemented interactive data visualization dashboards using Apache Echarts, displaying critical analytics like food import trends, price variations and geographic mapping.
- Optimized API Integration and data handling using React Query, ensuring efficient real-time updates and smooth user experience.
- Debugging the application to identify and resolve any front-end issues, optimizing performance and usability.
- Improved codebase readability and maintainability by refactoring react components and application logic.

Xoriant Solutions Pvt. Ltd., Pune, MH.   **Sep 2021 - Sep 2024**

Clients: Citi Bank, Daikin

- Crafted responsive and intuitive user interfaces using semantic HTML5, CSS3, JavaScript, ReactJS, and Tailwind CSS, implementing end-to-end functionality and ensuring a seamless user experience.
- Developed the migration of an existing legacy project to a modern tech stack, ensuring successful adoption of new technologies.
- Developed and tested the user interface as a front-end developer, fixed user interface related issues.
- Developed ReactJS components and used Kendo UI to build a modular and maintainable LMS calendar interface.
- Ensured code quality and adherence to best practices through code reviews and continuous integration processes.

PROJECTS

Project Title: FEWS   **Oct 2024 - Present**

- Developing FEWS from scratch, providing a scalable and high-performance web application for food import/export monitoring in KSA.
- Built interactive dashboards to visualize food-related imports, including origin countries, importing ports, quantities, values etc.
- Integrated Apache ECharts to implement bar charts, pie charts, area charts and line charts for price trend analysis and market insights.
- Developed map based visualizations to display geographic data of import origins and ports, improving analytical capabilities.

Project Title: Daikin City   **Jul 2023 - Sep 2024**

- Developing the ongoing migration of an existing legacy project to a modern tech stack, ensuring successful adoption of new technologies.
- Improved UI components based on latest trends and practices to enhance user experience and engagement.
- Ensuring the seamless integration of new tech stack while preserving the integrity and functionality of the existing system, optimizing performance and reliability.
- Developing ReactJS components to support the migration and enhance functionality within the Daikin City platform.

Project Title: HVAC & Daikin LMS Calendar   **Oct 2022 - Jun 2023**

- Developed ReactJS components and used Kendo UI to build a modular and maintainable LMS calendar interface.
- Allowed users to view events and event details without logging in, will redirect to event registration page or sign-in page as needed.
- Integrated frontend components with multiple existing Cornerstone APIs to ensure data consistency and reliability.
